

# Maintenance of road based ERS in a Nordic climate

Hans Säll  
Head of Business development, NCC Infra  
CEO and Chairman of the Board, eRoadArlanda

Tested during six Swedish winters since 2012

# How to handle snow, ice, water, gravel, leaves etc?

1. The design of the eRoad-connector
2. Built in heating cable
3. Ordinary plowing equipment can be used
4. Drainage every 50 m
5. Modified standard maintenance equipment

- Two track brushes
- Track plow
- Vacuum suction
