

Be in Charge.

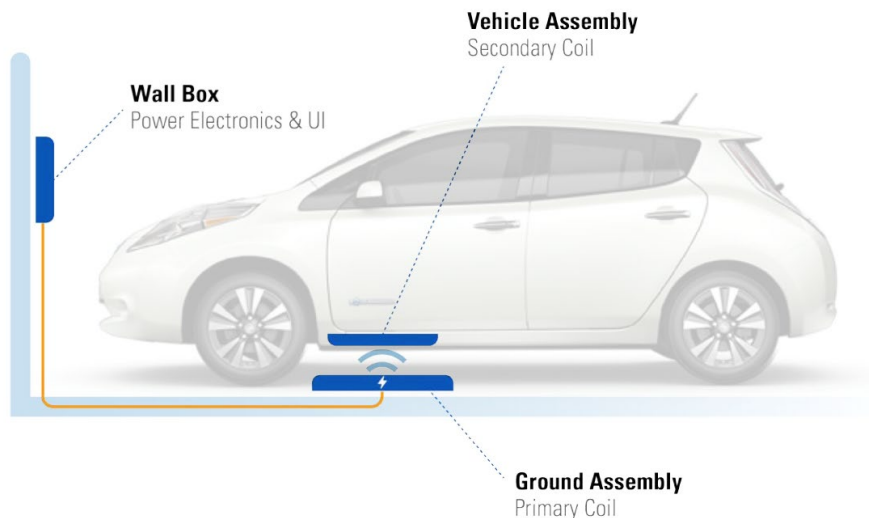

CERV 2020

Morris Kesler

Wireless EV Charging

MORE THAN JUST POWER

- Discussions of WPT work are often centered around the power aspect:
 - Power level, efficiency, matching topology, etc.
- Product systems require more functionality and additional considerations
 - Parking guidance and alignment detection
 - Object detection systems
 - Human safety
 - EMC/EMI
 - Standards compliance, interoperability considerations
 - Vehicle integration, size, thermals
 - Robust software solutions
 - Cost, cost, cost

Park-and-Charge.
It's that easy.
