

Creating a more Connected and Sustainable world

Brian Burkhard – Vice President Advanced Mobility Systems

Power and Charging Infrastructure requirements are driving innovation, alliances and delivery models to meet accelerated needs

Electrification Toolbox:

Plug-in Charging

Overhead via Pantographs

Wireless Charging

Electric Vehicle Charging Infrastructure

- We have relationships with most major charging manufacturers

Key Projects:

- MBTA Bus Facilities Modernization Program
- MBTA Alternatives Fuels Study
- Nevada DOT EV & Alternative Fuels Plan
- Rhode Island EV Transition Plan

EV Services:

- Forecasting demand scenarios for EV charging and energy requirements
- Identification & prioritization of charging infrastructure
- Investment and funding model development
- Extensive stakeholder engagement
- Advise on funding and investment options
- Focus on social equity
- Design of charging network

Thank You
